FAMILY TWISTER

The family slide. A waterpark is a generation-uniting experience. The Family Twister slide is perfect at bringing big and small guests together to have fun.

It uses single, double or triple rafts to slide down and allow for a great variety of options. Special features of this slide are the deep-drawn curves and the seamless transition between individual elements that allows for an extra smooth flow during direction changes. The combination of acceleration and circular motion throughout this ride will make for maximum enjoyment for everyone. The Family Twister has a capacity of up to 720 people per hour, therefore the well-known "Can we go again, pleeeease" will not be a problem. Optional translucent rings and portholes will add twinkling lights of sunshine which add to the family character of this slide. There is also an open version available: The Family Twister Cabriolet.

All values are guidelines – changes may occur after planning and approval by technical services
